An energizing public
dialogue on transforming
Seattle into a 21st
century city that is
climate-neutral,
pedestrian-friendly,
transit-oriented,
community-focused and
sustainably designed

GREGORY & WILDE July 11

Green Development = Economic Development

Monday, July 11, 2005, 5:30-7 p.m.
Seattle Central Library Auditorium

FEATURING: Bert Gregory, President and CEO, Mithun
Dennis Wilde, Sr. Project Manager, Gerding/Edlen Development

Come help us plan for a
brighter future. Hear nationally
recognized leaders in sustain-
able community development
at a forum designed to inspire
Seattle's business leaders and
citizens to
create a
shared vision
of urban
sustainability.

Learn how green building increases return on investment and strengthens economic development at our next event with guest speakers Bert Gregory and Dennis Wilde, who will share success stories from their work in Portland:

- the Brewery Blocks project, a five-block redevelopment of the former Blitz-Weinhard Brewery in the historic Pearl District that created a vibrant, post-industrial neighborhood and linked the Central Business District to the River District; and
- a study on the Lloyd District, where the city is planning for the future redevelopment of a 35-block neighborhood, while simultaneously targeting urban redevelopment goals that meet the environmental footprint of a pristine forest—even as the area's population and built space increase five-fold.

Gregory is President and CEO of Mithun, an architecture, design and planning practice that was honored with one of the U.S. Green Building Council's 2004 National Leadership Awards. A pioneer in sustainable design and environmental resource management in the Northwest, Bert has helped translate many abstract concepts on sustainable practice into high-performance building solutions for urban communities.

Wilde, Senior Project Manager for Gerding/Edlen Development Company, has been active in construction and real estate development since 1967. He has extensive construction and design management experience and more than 20 years of experience in urban planning and design. Wilde holds master's degrees in both city planning and architecture from the University of Pennsylvania and is active as a board member of The Oregon Natural Step Network.
